

**ONHANDSUPPLY.COM**

*IN YOUR HANDS WHEN YOU NEED IT*

**OnHandSupply.com (OHS) provides ANSI pump parts in 1-2 days ground or faster to almost everywhere in the lower 48 states. How and why?**

We studied the supply chain for ANSI centrifugal pumps and parts and took out everything that folks like you said you didn't like. Our route-to-market is a straight line...one factory to five initial regional warehouses to you. Even the factory is streamlined. It's vertically integrated; the engineering, foundry, testing, machining, assembly and service/repair departments are all one entity.

After we took the nonsense out of the supply chain, we put some "sense" back in.

- No PIN numbers or passwords required to view our website and prices.
- 24/7/365 Internet info of quantity, price and location of parts to fit Goulds™, Summit™, Griswold™, Deep Blue™ and OnHandSupply.com (OHS) pumps.
- Complete inventories in all locations for the small and medium ANSI pump brands listed above. Wetted parts are available only in CD4MuN and CF8M materials.
- A 3-hour courtesy hold feature. Who does that on the Internet?
- 24/7/365 telephone support for emergencies.
- Material name permanently etched on the parts. No tags or labels to lose.
- Dynamically balanced impellers, full-sized or trimmed for you.
- 1st class packaging. Parts foamed-in-place in double wall corrugated boxes. Labels on several sides for easy storage/reading. Bar codes and QR codes for fast, accurate receiving, storing, picking and inventorying.
- A full 2-year full credit return policy

**Again, OnHandSupply.com (OHS) is designed to deliver ANSI pumps and parts and related products fast. Parts in your hands in 1-2 days ground or faster to the lower 48 states except for parts of Montana and Idaho!**

Every part for the small and medium series of pumps is available and wet-end parts are stocked in both CD4MuN and CF8M. Casings (volute), rear covers (stuffing boxes) and impellers are investment-cast. Casings are pressure tested. Parts are etched with their material name so there are no tags or labels to lose. Packaging is foam-in-place with double wall corrugated boxes and labels on four sides with bar and QR codes to eliminate transit or storage issues.
